

Rule Clarifications

May 2, 2012

THUNDER STOCK; *(amendment)*

Rule 21.7:

The rule as printed reads a follows;

“Functional stock unaltered V8 OEM torque converter. Minimum weight 39 lbs full of oil.”

After researching this item and test weighing the weight is now adjusted to **32** lbs.

Rule 21.7 now reads as follows;

**“FUNCTIONAL STOCK UNALTERED V8 OEM TORQUE CONVERTER.
MINIMUM WEIGHT 32 LBS FULL OF OIL.”**

THUNDER STOCK; *(amendment)*

Rule 35.6:

The rule as printed reads a follows;

“Rear weight % for leaf spring cars maximum 47%, coil spring cars maximum 49% before racing commences for the evening.”

This is a misprint.

Rule 35.6 now reads as intended as follows;

*“Rear weight % for leaf spring cars maximum 47%, coil spring cars maximum 49% **AFTER** racing **IS COMPLETE** for the evening”.*
